

A Unique University in Northeast India:

NEHU and its Possibilities

Report >
South Asia

North-Eastern Hill University (NEHU) was established at Shillong, Meghalaya, by an Act of Parliament in 1973, in order to provide the northeastern states of India with an academic window to the region and to the world. The University provides consulting facilities to various ministries of the Government of India, as well as to such international agencies as the IDRC, UNESCO, and the Ford Foundation. It has the infrastructure for sophisticated scientific testing on various chemicals and receives requests and samples from over forty universities throughout the country. Its record on international collaboration with various European universities, particularly in Life Sciences and Physical Sciences, is noteworthy.

By T.B. Subba and Jan Brouwer

With the withdrawal of the Restricted Area Permit for foreign nationals from the states of Assam and Meghalaya, NEHU is welcoming institutional and individual international collaboration in the disciplines of Anthropology, Geography, History, Linguistics, Philosophy, and Sociology. Within NEHU's general policy to transmit, sustain, promote, and enhance traditions of academic practice, the School of Human & Environmental Sciences (SHES) supports and promotes research, teaching, and training programmes with the dual aim of enhancing pure scientific knowledge as well as its links with applications for the development of the region. The School encourages interdisciplinary and multi-dimensional research work with the other Schools at NEHU. The various departments of the University offer MA, MSc, MPhil, and PhD courses in various traditional fields as

well as newly emerging ones in respective disciplines.

The Department of Anthropology within the SHES is now a full-fledged department with specialized courses in both Social/Cultural and Physical Anthropology. The Department imparts fieldwork training in north-eastern and southern India to MA students and offers laboratory research projects to MSc students. The Verrier Elwin Memorial Museum is also being set up at this department. The advanced research programmes in Physical Anthropology include DNA research in collaboration with the Social Anthropology stream. Advanced research in the Cultural Anthropology stream includes interdisciplinary research programmes with a strong Indigenous Knowledge component.

The northeastern region of India not only offers a virtual goldmine for social science and humanities research, but also provides unique opportunities for comparison, both within and outside of India. The cultural and linguistic variation in the region is simply amazing and unparalleled anywhere else in the world. The (tribal) communities of the region are undergoing rapid changes as a result of Information Technology, and the resulting infrastructural and educational developments throw challenges to anthropologists to study how these cultures are facilitating and/or coping with the changes. In about half a century, various food-gathering and hunting communities have produced a well-informed and confident educated elite. This in itself is simply com-

mendable; and yet, the region still has almost half of its cultivable land under 'shifting cultivation'. The region is one of the richest in the world in terms of biodiversity, and the environmental richness is matched by the ethnic diversity and accompanying problems of political identity.

NEHU maintains an extensive network of connections for both teaching and research with the best universities and research institutes in India and abroad. In the thirtieth year of its existence, it now plans to extend this network to European universities and research organizations through its Schools and their departments. The University, with its dynamic faculty members, computer, Internet, laboratory facilities, and advanced programmes at MPhil, PhD, and post-doctoral levels, offers trained manpower, including anthropologists, who can collaborate with scholars from any university in the world. Such collaborations will be of mutual benefit to the participating scholars and institutions. <

Dr T.B.Subba is professor of Social Anthropology.

Dr Jan Brouwer is professor of Cultural Anthropology.

They both work at the NEHU Department of Anthropology and may be contacted at: C/o North-Eastern Hill University, Department of Anthropology, Mayurbhanj Complex, Nongthymmai, Shillong 793014 India. E-mail: tbsubba@sancharnet.in
