Golden Threats: The Chinese in regional North South Wales 1850-1950 and My Chinatown

Drawn from local museum collections in regional New South Wales, *Golden Threats: the Chinese in regional New South Wales 1850-1950* looks at the lives and contributions of Chinese-Australians in rural areas and country towns between 1850 and 1950. With the use of objects, historical photographs, documents and people's stories, the exhibition and accompanying website (<http://amol.org.au/goldenthreads>) show the diversity and depth of Chinese history and heritage in New South Wales.

A focal point of *My Chinatown* is the annual Chinese Dragon ball, a major social event and fundraiser for Sydney's Chinese community through most of the twentieth century. A collage of photographs shows the ball in its heyday with the crowning of the Dragon Princess and the Debutantes who danced the night away at the Trocadero, a grand ballroom in Sydney's George Street.

Ancient bronzes of the Asian grasslands from the Arthur M. Sackler Foundation
The exhibition presents a major sampling of steppe art from the renowned collections of the late Arthur M. Sackler, MD. Eighty-five objects illustrate the personal decorations and equipment of the horse-riding steppe dwellers of the late second and first millennia BC. The bronze belt-buckles, plaques and weapons of these ancient horsemen are ornate, technically sophisticated, and richly patterned. Animal motifs including antlered stags, wild boars, and birds of prey are symbolic artistic themes. The exhibition reveals how steppe cultures used the animal world as a source of symbols to indicate tribe, social rank and connection to the spirit world.

Treasures of the Sons of Heaven
Objects in this exhibition range from famous paintings to collection cabinets made from various precious materials. They do not only reflect the diversity and creativity of Chinese art, but also the intellectual and political developments of Chinese history. The exhibition focuses on human beings and their relationship to nature and society through objects. It documents the magnificence of art from the Chinese Imperial court and brings to view masterworks from the symbolically rich tradition of Chinese scholars.

50th Biennale di Venezia: Dreams and conflicts: The dictatorship of the viewer
The previous Visual Arts Exhibition of La Biennale di Venezia featured 'The End of the Twentieth Century' by Joseph Beuys. This work signalled the end of the cycle of large-scale thematic exhibitions, which began in the late 1960s. As a result, the omnipresent curator was forced to acknowledge the broad and fragmented field of contemporary art. It became clear that any notion of the 'global,' could no longer be framed by the sole vision of the curator.

The 50th Visual Arts Exhibition of La Biennale di Venezia considers this its starting point from which to reflect on the very idea of the 'large scale international exhibition,' questioning the validity of this form as representative of the current status of contemporary art, addressing its multiplicity of languages, and the inevitable autonomy of new geographic, political, and cultural contexts. Among many others: Zone of urgency with Sha Yeya, Yang Yong, Yang Zhen-

The Art of Hokusai: Masterpieces of Japanese Woodblock Print

This exhibition of the work of the Japanese woodblock print designer, Katsushika Hokusai (1760-1848) displays his renowned prints of beautiful women, landscapes, flowers, and animals, as well as illustrated books and artists' manuals. He was the first Japanese artist to become popular in the West in the late nineteenth century where images like 'The Great Wave' influenced European artists such as Manet, Van Gogh, and Toulouse-Lautrec. The exhibition features 75 of Hokusai's finest prints and printed books.

Korewori: Magic Art from the Rainforest
 Forty years ago, fascinating wood sculptures of creator-beings and demons from the area of the Korewori River in Papua New Guinea first became widely known to the Western world. Even when they were found, protected by protruding rocks, these carved wooden figures were considered the 'last witnesses of a lost culture'. In 1971, the Museum der Kulturen succeeded in acquiring 86 of these figures with the support of a spectacular fund-raising charity. Today the museum owns more than half of the 200 existing figures worldwide and for the first time, this unique cultural heritage will be on display for the public.
